

Halve your fears and double your skills in one weekend!

Country Trax presents... Weekend Off-road Riding Course

Master a new set of skills, build confidence and be comfortable on gravel. This three-day course has been designed for dual purpose motorcycle riders who wish to improve their skill and confidence when riding off-road, and builds on the principles laid down in the *Country Trax Introduction to Off-road riding* course. The course is structured to accommodate all skill levels, but you should be confident and experienced on tar.

Some key elements covered in the course

- * Theory of motorcycle dynamics in off-road conditions - understanding why and how the motorcycle responds to rider input.
- * Being 100% in control of your motorcycle in all situations
- * Practical exercises in a wide range of terrain conditions, but in a safe and controlled environment.

and lots of riding during the day!

Reviews

"My advice to bike owners with dirt road aspirations is simple: If you are so talented that you do not need Jan du Toit's course you better not ride faster than what your guardian angel can fly." - Country Trax course member.

"Training accelerates what can take years to learn the hard way by trial and error; what does it help to keep trying to go faster practising mistakes?" Comment on Wild Dog Forum
